
SPRING MEADOWS COMMUNITY MEETING 1-10-24

Sam Cascardo/ Mary Schaeffer

COMMUNITY CONCERNS

Safety Concerns- Streets and Lighting

Parking- Issues

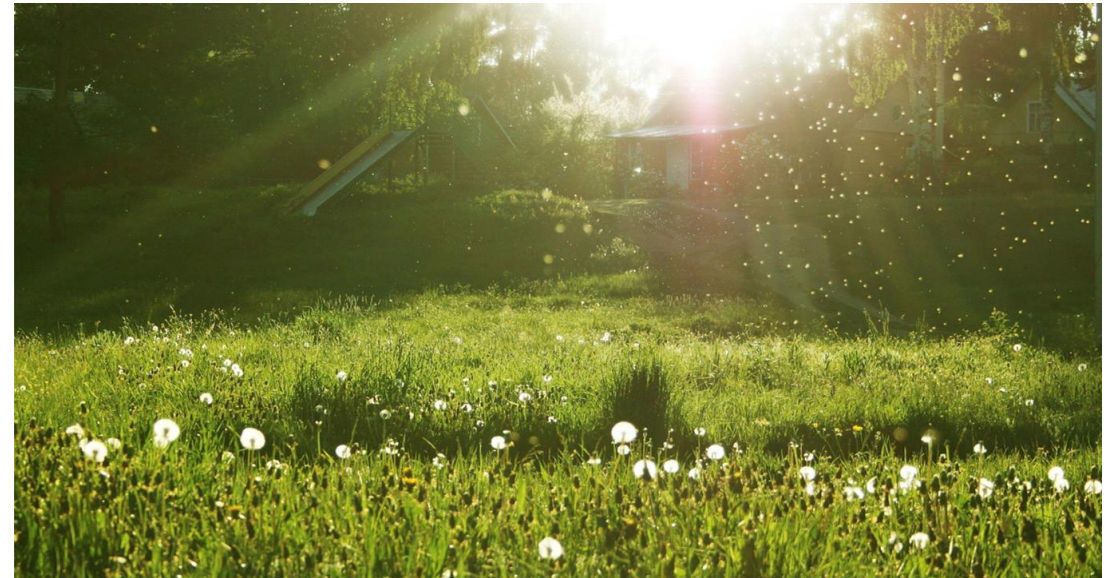

Amenities

New Homeowner Children

Budget Ratification Meeting- Notes

INTRODUCTION

Spring Meadows Property started in 2021. The first set of homeowners moved in was 03-2022. The Cusick Management team partnered with Pulte as our community's HOA on 05-2022. Since the timeframe, our community addressed several concerns that still have not been corrected. Since that time, new issues have arisen. Our goal is to help our community stand together and have a game plan when homeowners can become board members to overturn some of the rules.

SAFETY CONCERNS

Paved Road around the property:

The current road condition of the property has several man-holes, cracked sidewalks, and driveways with 2 to 5-inch gaps of missing asphalt on the property of Spring Meadows.

The details on when this was/has been addressed are below:

11-7-22

12-6-23

- **Remediation:** An official email has been sent to the Board Members, and we are waiting for a response from the director and team. Last update 1-8-24

SAFETY CONCERNS

Streetlights

There are still not enough streetlights to cover the safety of our community. It's our understanding that Duke-Energy would complete this; however, there are still light pole structures on the ground, and light poles are still not installed.

The details on when this was/has been addressed are below:

- 11-7-22
- 12-6-23
- Public Information- Its on record that a suspicious man was reported walking our property on 11-23
- **Remediation:** An official email has been sent to the Board Members, and we are waiting for a response from the director and team. Last update 1-8-24

SAFETY CONCERNS

Parking

Due to safety concerns, is there a way we can have an exception to allow our community guests to park at the model home when it's not during business hours?

- **Remediation:** An official email has been sent to the Board Members, and we are waiting for a response from the director and team. Last update 1-8-24

AMENITIES

By health codes and the National Swimming Pool Foundation

Capacity: **20 square feet per person in a pool in a depth within five feet or less or 15 square feet per person in a pool with a water depth over five feet.**

The pool under construction is not within the National Health Code standards. We will have 147 family homeowners.

As a community, we are not ok with this answer. We want this decision re-evaluated. There are several apartment complexes with fewer residents that have bigger swimming pools.

Remediation: An official email has been sent to the Board Members, and we are waiting for a response from the director and team. Last update 1-8-24 (City of Concord was contacted and NC doesn't have a regulation for capacity). **We were also informed that HOA dues may be increased to maintain the pool.**

NEW HOMEOWNERS' CHILDREN

Children are doing the following: creating unsafe situations, vandalizing trespassing, and harassing neighbors by ghost doorbell ringing.

Remediation:

- 2 formal complaint letters were created
- Data was collected and documented
- Letters and supported evidence was sent certified mail.
- Director is contacting the homeowners, but I don't which method is being used. 1-8-24
- Petition created for our community to sign at your discretion:
- <https://chng.it/PHcVgXWMR5>

BUDGET RATIFICATION MEETING- NOTES

- Can we have the water overflow ponds treated to manage the over-populated frog problem our community is having?
 - Answer: No
- Can we have a dog park?
 - Answer: No
- Can we have additional parking constructed for our community?
 - Answer: No
- Issue with consistent WIFI within our property.
 - Mary answered: Issue is from setting your WIFI router to a specific channel causing interference with other WIFI routers.
- Can something be done about dogs roaming without a leash , invisible fence, or supervision?
 - This is addressed with the official complaint letters sent to the HOA board members.
- Can a traffic light be installed to prevent cars from speeding on Roberta Road?
 - Answer : They will follow-up
- When will Pulte be finished with the project?
 - Answer : 2024
